(54) Title: PERSONALIZED AUDIO/VIDEO/TEXT WELLNESS PROGRAM

(57) Abstract: A system generates one or more of a plurality of wellness programs for a user. Personal data items are entered into a computing system corresponding to a personal profile of the user. A selected one or more of the plurality of wellness programs desired by the user is identified. Selected ones of the plurality of personal data items are then extracted in response to the selected one of the plurality of wellness programs. Then a corresponding plurality of wellness program data elements in response to the selected ones of the plurality of personal data items is determined. The selected plurality of wellness program data elements are then assembled to form a customized wellness program responsive to the step of identifying a selected one of the plurality of wellness programs and the selected ones of the plurality of personal data items. The customized wellness program is recorded on media for the user.
